Assessment of Survivor Outcomes

GOAL OF ASSESSMENT

SURVIVOR DEMOGRAPHICS

Evaluate a survivor's functioning and level of vulnerability to revictimization.

INSTRUCTIONS

Survivor Name:

Complete this tool based on your assessment of the survivor's functioning and circumstances within the last 30 days. Provide one score per subdomain on a scale of 1 to 4. Survivor input should inform the assessment of each subdomain and can include input from the survivor's caregiver or other household members, other providers, and/or the assessor's direct observations. The assessor should use professional judgment based on all available information, seeking to best reflect the survivor's strength or vulnerability in each subdomain. An accompanying guidance manual is available for guidance on scoring and specific assessment points, a sample interview guide, and other resources.

Type of Abuse Experienced:

surname, first name	□Commercial Sexual Exploitation
Date of Birth: dd-mmm-yyyy	□Sexual Violence
(or age if unknown)	□Forced Labor Trafficking
